**FINAL JUDGMENT**

On November 8, 2023, this Court heard argument in this case. Having considered the pleadings, administrative record, briefing, law, and argument of counsel, the Court has concluded that the Texas Commission on Environmental Quality's Final Order signed April 8, 2022, denying Plaintiffs' hearing requests and approving and issuing Air Quality Permit No. 162941, should be REVERSED and REMANDED back to the Commission for a contested case hearing on all relevant and material disputed issues of fact or pursuant to other instructions provided by this Court.

This Judgment is final, disposes of all parties and claims, and is appealable.

SIGNED this 30th day of November, 2023.
