Subject: RE: Talking Points on APGA and the furnace rule

Apologies. I didn't get back to you on climate change. Unfortunately, we do not oppose the concept of climate change. We used to but somehow that changed over the past few years and now we are proponents of acting as a response to climate change. ☹

Subject: Talking Points on APGA and the furnace rule

Sue,
Here are the talking points on the furnace rule and APGA's response. The timeline starts in 2011 with the DFR. I am also including the value statement for your reference. I am trying to think what else you need.

Also, this Sunday we are having a Direct Use Task Group meeting and two of the major issues we are discussing are revising our climate change resolution and possibly engaging Alex for some additional work.

Here is a link to our current policy. They question our members are debating is if we should take a hard stance and oppose climate change. Does SoCal have a position on climate change? Also any initial thoughts on possibly engaging Alex to some additional work.
