## **List of Plants Where Coal-Ash Contaminated Groundwater Exceeds Allowable State and/or Federal Limits** *(including Cleanup Plans & Known Public Meeting Information)*

This table lists 133 plants in 29 states and Puerto Rico whose owners have posted notifications that the groundwater exceeds state and/or federal limits of contamination, *without* a known alternative source demonstration, for one or more of the following toxic substances: Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Lead, Lithium, Molybdenum, Selenium, Thallium, and Radium 226 and 228 combined.

In addition, many of these units are coal ash ponds that are unlined and violate the federal aquifer separation standard, which requires five feet of separation from the base of the pond to the underlying groundwater.

Each plant owner must develop a cleanup plan (“Assessment of Corrective Measures”) designed to remediate any coal ash releases and to restore the contaminated area to its original condition. The plans must be *initiated* within 90 days of a contamination finding, and notice of initiation may be publicly posted up to 60 days after initiation. Cleanup plans must be *completed* within 90 to 150 days of initiation, and publicly posted 30 days after completion. Owners may attempt to show that an alternate source is responsible for the contamination. Cleanup plans are required at all plants if the owners do not demonstrate that a source other than the regulated coal ash dumps caused the contamination.

**PUBLIC MEETING:** The plant owner must discuss the results of the corrective measures assessment with interested and affected parties at least 30 days before the company selects a remedy. While there is no strict deadline for remedy selection, the utility must select a cleanup plan “as soon as feasible.” Thus, the exact dates of public meetings will be determined on a site-by-site basis.

**PUBLIC ENGAGEMENT IN THE CLEANUP PROCESS:** It is critical for affected communities to play an active role in the review of the cleanup plan and in the cleanup selection process. Because there is no required oversight role for U.S. EPA or state regulators, active community members are the frontline for ensuring adequate cleanup at these contaminated sites. Community evaluation of the cleanup plans will be necessary to ensure timely, comprehensive, and health-protective remediation. For tools and tips to advocate for the most protective outcome, *see* <https://earthjustice.org/coalash/toolkit/doc>.

Additional information about the individual coal ash dumps at each plant, including links to owner compliance websites, is available on a map at <https://earthjustice.org/features/map-coal-ash-contaminated-sites>.

	Name of Plant	Owner/ Operator	State	City	Contamination Found Above Federal and/or State Groundwater Limits	Cleanup Plan	Initial Public Meeting Date / Details
1	Healy Power Plant	GVEA	AK	Healy	antimony, arsenic, lithium, molybdenum, selenium	<a href="#">REPORT</a> 8/2018	
2	Charles R. Lowman Power Plant	Power South Energy Cooperative	AL	Leroy	beryllium, cobalt, lithium, molybdenum	<a href="#">REPORT</a> 7/11/2019	
3	Colbert Fossil Plant	Tennessee Valley Authority	AL	Tuscumbia	arsenic, cobalt	<a href="#">REPORT</a> 7/15/2019

Plants whose owners have posted notifications that the groundwater exceeds state and/or federal limits of contamination, as well as an alleged Alternate Source Demonstration for applicable units:

1. Plant Scherer, Georgia Power Company, GA
2. Plant Wansley, Georgia Power Company, GA
3. Nearman Creek Power Station, Kansas City Board of Public Utilities, KS
4. Big Sandy Plant American Electric Power, Kentucky Power Co., KY
5. Boswell Energy Center, Minnesota Power, MN
6. John Twitty Energy Center, City Utilities of Springfield, MO
7. Plant Victor Daniel, Mississippi Power, MS
8. Nebraska City Generating Station, Omaha Public Power District, NE
9. Montour Steam Electric Station, Talen Energy, PA
10. H.W. Pirkey Power Plant, American Electric Power, TX
11. J. Robert Welsh Power Plant, American Electric Power, TX
12. Virginia City Hybrid Energy Center, Dominion Energy, VA
13. Mount Storm Power Station, Dominion Energy, WV

See [\*A Toolkit to Advocate for Coal Ash Cleanups\*](#) for additional information.
